Experience

IT Systems Tech

Douglas County Community Services Board DBA ONE Community Health Solution

Douglasville, GA

Apr 2024 – present

- Built ETL pipeline using Python to migrate EHR providers. Turned a multi-month process into a 2 hour script run.
- Created and maintained reporting infrastructure built in Python using Ibis, PyDoll, and DuckDB that increased accountability and reduced missed notes and chargeslips by 99%.

Overnight IT Service Desk Analyst

Intellitech DBA Frontline Managed Services

Atlanta, GA

Feb 2020 – Aug 2021

- Achieved 5% growth for SLA using technical skills to solve tickets and improve documentation.

Projects

Report Automation

Apr 2024 – present

Automated reports from company's Electronic Healthcare System using Data engineering principles such as ETL.

- Made a manual process that would take months possible in the span of a couple hours.
- Made tracking certain KPI's possible, increasing our compliance with our contracts.

Marketing Ai

Jan 2024 – June 2024

Lead the development of a Python application that ran a local LLM using Ollama to help marketing teams generate campaigns from trending news articles.

- This project won 1st place in Computer Science Case Study at the 2024 National FBLA Leadership Conference.
