Education

Kennesaw State University

BS in Software Engineering

Marietta, GA

Aug 2024 – present

West Georgia Technical College

AAS in Computer Programming, Computer Support Specialist

Douglasville, GA

June 2022 – May 2024

- FBLA Collegiate Chapter **Vice President**, 2023
- Georgia FBLA Collegiate **Vice President of Communication**, 2024

Experience

IT Systems Tech

Douglas County Community Services Board DBA ONE Community Health Solution

Douglasville, GA

Apr 2024 – present

- Developed a Python ETL pipeline to migrate EHR provider data, reducing a multi-month manual process to approximately two hours of automated execution.
- Developed and maintained Python reporting infrastructure using Ibis and DuckDB, improving operational accountability and reducing missed notes and charge slips by 99%.

Overnight IT Service Desk Analyst

Intelliteach DBA Frontline Managed Services

Atlanta, GA

Feb 2020 – Aug 2021

- Resolved technical issues across managed client environments while meeting service-level requirements and improving internal documentation.

Projects

Cognito - Master the Inquiry

June 2024 – present

Developed a Godot-based Jeopardy-style game show application for a live event client, replacing a PowerPoint-based workflow with a dedicated interactive application.

- Designed the application architecture in GDScript, including separate game display and host control interfaces.
- Implemented configurable themes, question-set loading, input validation, game-state management, and reusable UI components.
- Designed the application for portable deployment without requiring installation or external runtime dependencies.
- Currently expanding the application with media support, persistent settings, improved controls, and a question-set creation workflow.

Marketing AI

Jan 2024 – June 2024

Led development of a Python application that used a locally hosted LLM through Ollama to help marketing teams generate campaigns from trending news articles.

- Integrated local LLM inference with external news data to create an automated content-generation workflow.
- Designed the application to process, transform, and provide relevant source information as context for generated campaigns.
- Won 1st place in Computer Science Case Study at the 2024 National FBLA Leadership Conference.

Skills

Development: Object-Oriented Programming, Data Structures, Algorithms, Software Development, Application Development, Software Design, Modular Design

Engineering: Git, Version Control, Testing, Debugging, Error Handling, Logging, Documentation, Agile/Scrum

Data: SQL, Relational Databases, ETL, Data Pipelines, Data Processing, Data Validation

Languages: Python, Java, C#, GDScript, JavaScript, HTML, CSS, SQL

Web & APIs: REST APIs, HTTP, JSON, Web Automation, Asynchronous Programming

Deployment: Docker, AWS, Linux

Business Programs: Excel, Word, PowerPoint

Awards & Leadership

Georgia FBLA Collegiate State Leadership Conference

- 1st PLACE PROGRAMMING CONCEPTS, *April 2023*
- 1st PLACE FOUNDATIONS OF COMPUTER SCIENCE, *April 2024*
- 1st PLACE TECHNOLOGY & COMPUTER SCIENCE CASE COMPETITION, *April 2024*
- 1st PLACE FOUNDATIONS OF TECHNOLOGY, *April 2025*

FBLA Collegiate National Leadership Conference

- 1st PLACE PROGRAMMING CONCEPTS, *June 2023*
- 1st PLACE TECHNOLOGY & COMPUTER SCIENCE CASE COMPETITION, *June 2024*
